**INCIDENT NARRATIVE**

Blanco County ESD 2 was dispatched to assist Blanco County ESD 1 for a reported water rescue.

Engine 81 went en route, and while en route, Engine 81 contacted dispatch for updated info and directions. Directions were given to be on JW Ranch at 101 Schneider Ln. Johnson City, TX. Engine 81 arrived on the scene with Medic 32 already on the scene with deputies. The engine crew walked to the scene due to the terrain and accessibility of the location. Once on location, I was given an update on the situation from Medic 32 who had command. The report given by command was 1 vehicle in the water with a possible victim trapped inside the vehicle. The vehicle was completely submerged underwater. The Deputies were in the water standing on what they believed was the vehicle, trying to gain access to the possible victim inside the vehicle.

Engine crews donned appropriate PPE gear for the rescue and set up scene lighting. Two-man search crew was deployed to search the rest of the bank of the pond for possible victim(s). Dispatch was contacted by command for the possible dive team to make a location, but no dive team was available. Deputies were still in the water attempting to gain access to the victim. Additional fire units arrived on the scene. Medic 32 requested Medic 71 to make the location. Chip 2 and Medic 71 arrived on location. The tow truck arrived on location and was attempting to reach the vehicle with tow chains from the other bank but was unable due to distance.

 INCIDENT NARRATIVE

The two deputies who were in the water standing on the submerged vehicle requested tools to break the window of the vehicle to perform a possible rescue. One EMS crew member donned water rescue PPE and entered the water with a Hallagan tool. One Firefighter entered the water wearing proper water PPE relaying tools to attempt rescue, several tools were used to attempt access to the victim. A two-man search team completed a search of the pond with no victims found. A two-man search team was then tasked with relaying tools to assist in rescue operations. Tools used were the Hallagan tool and the Pike Pole. Command stayed on shore to monitor safety and progress. The victim was successfully extricated from the vehicle and brought to shore by the rescue team. Once the victim was on shore, medical care was provided.

The engine crew assisted with patient care. Command contacted medical control and resuscitation efforts were seized. For patient medical report see Medic 32 patient report. Engine 81 crew remained on scene with the medic crew to assist in cleanup and equipment decon. Engine 81 was released by command and returned to service. EOR
